Subject: Pandemic Response Funding Opportunity

New Funding Opportunity

REMADE is excited to share a funding opportunity that NIST recently opened to support the nation's response to the COVID-19 pandemic. Only Manufacturing USA Institutes such as REMADE are eligible to participate in this opportunity. NIST anticipates awards to be between \$250,000 to \$10 million.

That is why we are contacting you - our Members - to query your interest in partnering with REMADE on this initiative.

If you have an idea for a rapid, high impact project that supports the nation's response to the COVID-19 pandemic and aligns with the [mission](#) of the REMADE Institute, we want to hear about it. Please send a short abstract that outlines your idea to remade@remadeinstitute.org. Once we have had a chance to review it, we will contact you to arrange further discussions.

We look forward to hearing from you!

NIST Funding Manufacturing Institutes to Support Pandemic Response

The U.S. Department of Commerce's National Institute of Standards and Technology (NIST) has opened a funding opportunity for rapid, high-impact projects that support the nation's response to the COVID-19 pandemic. Using funds appropriated by the Coronavirus Aid, Relief, and Economic Security (CARES) Act signed by President Trump on March 27, 2020, NIST will award these grants through the NIST Manufacturing USA National Emergency Assistance Program with no requirements for cost matching.

Funding will be awarded to eligible Manufacturing USA® institutes, a network of 14 public-private partnerships that work with academic and private sector manufacturing organizations on research and development and manufacturing skills training.
